Phonics Alphabet

Phonics is a system you can use to learn how to pronounce English words. Each letter of the alphabet has a sound that goes with it. When you learn all of these sounds, you can read any English word!
**Phonics**  *Double Consonants*

There are special sounds that come from combining certain consonants together. For example, a "c" and an "h", which make different sounds in the first place, make a third sound when joined together as "ch".

![Images of words like Chair, Clock, Sing, Phone, This, Math, Ship, and Whale]

**Phonics**  *The "Magic E"*

Words that end with the letter "e" tend to change the sound of the prior vowel. Keep an eye out for this when pronouncing English, as it can be tricky!

![Images of words like Cake, Complete, Five, Rose, and Cube]

**NOTE:** The phonics shown on page 45 isn't taught in the elementary-level Hello English Activity. It's taught in the first year of junior high school. That said, please feel free to study it if you want to learn more!
